

Career Objective

Entry-level Software Engineer with knowledge of Java, HTML, CSS, JavaScript, and Full Stack development. Understanding of programming fundamentals and object-oriented programming concepts. Ability to develop basic web applications and write clean, structured code. Eager to start a career in the software industry, learn new technologies, and contribute to application development and team goals in a growth-oriented organization.

Educational Qualification

- **MCA – Mater of Computer Application** | Jawaharlal Nehru New College of Engineering | 2026 | **84%**
- **BSC-Bachelor of Science**|SR Nagappa Shetty Memorial National College of Applied Sciences | 2024 | **74%**
- **PUC – PCMB** | Gangothri Independent PU College,Shimoga.| 2021 | **71%**
- **SSLC** | Girideepam English High School | 2019 | **79.54%**

Projects

REAL-TIME COLLEGE BUS TRACKING SYSTEM

- Designed and developed a web-based application to monitor college buses in real time using GPS location updates
 - Implemented user and driver authentication with role-based access control for secure system usage
 - Built live location tracking and status update features through an interactive web interface.
 - Improved transport visibility and student convenience through continuous and accurate bus monitoring.
- Applied concepts of real-time data handling, web application development, and system design.

Technologies: Java, HTML, CSS, JavaScript, MySQL, GPS Integration

Technical Skills

- **Programming Languages:** Java (Core, OOP, Collections, Java 8)
- **Backend Technologies:** Spring MVC, REST APIs, JDBC
- **Web Technologies:** HTML, CSS, JSP
- **Databases:** MySQL, SQL
- **Tools & Platforms:** Git, GitHub

Internship

Software Development Intern — Xworkz ODC, Bangalore

February 2026 – Present

- Developed backend modules using Java, Servlets, JSP, JDBC, and Spring MVC.
- Implemented CRUD operations with MySQL following MVC and layered architecture.
- Collaborated using Git-based workflows and participated in code reviews.
- Focused on writing clean, maintainable, and reusable backend code.

Technical Summary

- Strong proficiency in **Java** with solid understanding of **Object-Oriented Programming (OOP)**, **Collections**, **Exception Handling**, and **Java 8 features**.
- Hands-on experience in **backend development** using **Spring MVC**, **Servlets**, and **JDBC** to build scalable and maintainable web applications.
- Good knowledge of **HTML**, **CSS**, **JavaScript**.
- Familiar with **RESTful API development**.
- Familiar with **database design and management** using **SQL** and **MySQL** for high-performance applications.

Certifications

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- Certification in Research Methodology and Intellectual Property Rights (IPR), 2024
- Completed foundational training on AWS cloud concepts, core services, security, pricing, and real-world cloud application fundamentals.
